High Capacity Drive-in Rack For 1200*1200*3600 Pallets In Industrial Warehouse Storage

Our Product Introduction

Basic Information

Product Specification

- Model NO.: QF-Drive In Rack
- Material: Steel
- Structure: Rack
- Type: Pallet Racking
- Mobility: Fixed
- Height: 5-15m
- Weight: 2000
- Closed: Open
- Development: New Type
- Serviceability: Common Use
- Color: Customized
- Lead Time: 25 Days
- Raw Material: Q235
- Surface Treatment: Powder Coating
- Transport Package: Standard Export Packing

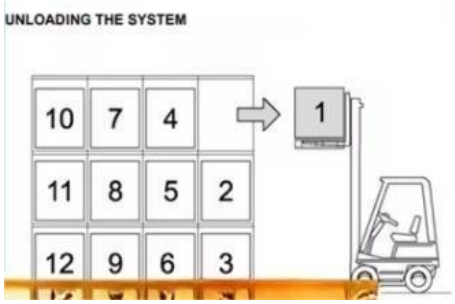
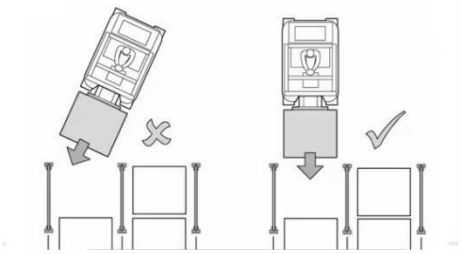
Placing a pallet

1. Driver should square the forklift with the pallet rack bay opening.
2. Lift the pallet 20mm above the rails.
3. Slowly drive to the open pallet position and carefully lower the pallet.
4. Slowly back away from the system.

Retrieving a pallet

1. Square the forklift outriggers elevated to the height of the pallet to be removed.
2. Secure the pallet with the forklift.
3. Raise the load approximately 20 mm above the rails and slowly and completely out of the system.
4. Carefully turn the forklift in the aisle to prevent rack impact and damage.





APPROACHING AND ENTERING THE RACK

1. The forklift truck should approach the rack squarely and not at an angle.
2. No attempt should be made to deposit/retrieve pallets or to enter a rack when the truck is NOT ncorrectly aligned.
3. It is not acceptable to attempt to re-align a truck after entry into the rack.
